

At Last, Sharper Image Integrated Flat Panel Thin Client

NetPanel™
X6400

The NP-X6400 fits right in to your IT infrastructure, supporting sharp video and crisp windows to access centralized applications over the network.

Your corporate users demand a lot from their PC desktops. They want a sharp, crisp, flat display for viewing business applications and high definition videos. You like Zero maintenance and simple management.

GOOD NEWS! YOUR ALL IN ONE SOLUTION HAS ARRIVED

With the NetPanel™ X6400, you move up to light-speed. Your tasks run smoothly and quickly—and you save valuable time you can use elsewhere. With an integrated 17" LCD panel, this new thin client delivers crisp video to the desktop, but at a substantially lower TCO than traditional networks. Easy to install, easy to use, and easy to manage—the NP-X6400 is the fastest ThinClient solution for the Enterprise network infrastructure.

- **Be in two (or more) places at once.** Separate windows access Unix, and web servers simultaneously. The thin client local windows access applications from server. Each local window corresponds to application running on a server. Get more done in less time.
- **Say goodbye to local application updates.** All applications are centralized, meaning your network updates all workstations from one main location. Simple and easy.
- **Share your work without leaving your desk.** Move teamwork to a new level with all peripherals stored together on the TCP/IP network.
- **Connect to all the resources you need.** Built-in support for all industry standard protocols fits seamlessly into your IT infrastructure—including TCP/IP, Microsoft RDP, Citrix ICA, and XDMCP. Relax. You're connected.
- **Manage remotely with no headaches.** Using a Web browser, VNC, or NetAdmin™ software, remote management is a breeze. Click. Click. Done.
- **Upgrade painlessly.** No more complex boot server software installations. Just upgrade over the network using the latest Flash storage technology. (And get multiple feature sets to address specific requirements...anytime you need them.)
- **Enjoy peace and quiet.** No more annoying hums and clacking noises. The NP-X6400 makes so little sound that you may even forget it's on.

For a free 15-point evaluation of your current network, call 866-792-2647 or visit www.atlabs.com. An expert technician will ask you a few questions and quickly determine if a Thin Client is a viable option for you.

Thin Client X6400 for Enterprise Applications

Hardware Specifications

Processor	1.0Ghz
Memory	256MB expandable to 512MB
Flash Memory	128MB expandable to 2.0GB
VGA Port	1280 x 1024 at 32-bit
Display	17" LCD Panel
LAN	One 10/100 Base-T
Keyboard/Mouse Port	PS2 mini-DIN
Serial Port	One RS232C/ DB9
Parallel Port	One DB25
Smart Card	Yes
USB	Two
Sound	16-bit stereo, mini-mic
Power Supply	External, auto sensing
Dimensions	13.4in H x 14.5in W x 3.8.0in D
Protocol	Microsoft RDP & Citrix ICA

Software

Operating System	Embedded Linux
Server Support	Windows 2000 advanced server, Windows 2003 w/term services, Citrix Metaframe Linux and Unix
Web access	Full featured, Mozilla/Firefox
Sessions	Multiple, in Windows
Terminal Emulations Suite	Complete. Includes: IBM, DEC, HP,SCO Tandem, Data general, and Wyse
Network Protocols	TCP/IP, PPPoE, Dial-up, DNS Client, WINS Client, DHCP Client
Printing	Local thru RDP & ICA, LPD
Mgt. Software	AT Labs Inc NetAdmin™ remote management software and VNC
