

Make Your Work Life Easier

With The Only Thin Client Solution For CE.NET

Your work life just got easier with the NetTerminal™ 5000CE—the only ThinClient solution for Microsoft .NET. Your applications run from central servers, eliminating the headache of local application updates and management.

Are you a demanding Enterprise, retail, healthcare, or education user? If so, you know the havoc caused by your team's technology problems. Different versions of applications create confusion. Installations are nightmares with IT technicians running around the office to troubleshoot workstations. Some programs load easily while others are often incompatible with certain desktops.

TIRED OF ALL THIS?

Your work life just got easier with the NetTerminal™ 5000CE—the only ThinClient solution for Microsoft .NET. Your applications run from central servers, eliminating the headache of local application updates and management. Since when has your terminal been so easy to install, easy to use, and easy to manage? Since now.

How can the NT-5000CE improve your productivity?

- **De-clutter your desk.** Lean and sleek, the NT-5000CE is only 8.4 inches tall. It takes up so little space you'll hardly even know it's there. Say goodbye to big bulky boxes that get in your way.
- **Rest assured your confidential business information is secure.** It's all on the centralized server with one single point of management, meaning nobody can access it (nor copy it to a hard drive) without your permission. Breathe easier. You're safe.
- **Cut costly maintenance from your budget.** Advanced design with low power consumption + Solid-state storage for longer life = Your money saved.
- **Say goodbye to local application updates.** All applications are centralized, meaning your network updates all workstations from one main location. Simple and easy.
- **Life is easier with everybody on the same page.** All workstations use the same operating system and the same versions of each application. Each user sees exactly what everybody else sees. No more confusion.
- **Connect to all the tools you need.** Built-in support for all industry standard protocols fits seamlessly into your IT infrastructure—including Microsoft RDP and Citrix ICA with I/O mapping. Relax. You're connected.

Legacy applications are not a problem, either. The NT-5000CE supports fifteen (15) emulations, including IBM 5250, VT420 and Wyse 60/50.

- **Manage remotely with no headaches.** Using NetAdmin™ remote management is a breeze. Click. Click. Done.
- **Upgrade painlessly.** No more complex boot server software installations. Just upgrade over the network using the latest Flash ROM technology. (And get multiple feature sets to address specific requirements...anytime you need them.)

For a free 15-point evaluation of your current network, call 866-792-2647 or visit www.atlabsinc.com. An expert technician will ask you a few questions and quickly determine if ThinClient is a viable option for you. It takes only 15 minutes and you don't have to give us your contact information if you don't want to. No unwanted mailings or phone calls. We respect your privacy.

The Only Thin Client Solution For CE.NET

Hardware Specifications

Processor	1.0 Ghz
Memory	128 MB
Flash Memory	64 MB
VGA Port	1280 x 1024 at 32-bit.
LAN	One 10/100 Base-T
Keyboard/Mouse Port	PS2 mini-DIN
Serial Port	One RS232C/ DB9
Parallel Port	One DB25
Smart Card	Optional
USB	Six
Sound	16-bit stereo, mini-mic
Power Supply	External, auto sensing
Dimensions	8.4in H x 1.8in W x 8.0in D
Protocol	Microsoft RDP, Citrix ICA, Telnet, Secure Shell

Software

Operating System	Windows CE 5.0
Server Support	Windows 2000 advanced server, Windows 2003 w/term services, Citrix Metaframe
Web access	Internet Explorer - Limited
Sessions	Multiple, with hot key
Terminal Emulations Suite	Limited. IBM, DEC, Wyse
Network Protocols	TCP/IP with DNS, DHCP and PPP, load balancing supported by Citrix ICA, remote host connect via VPN
Printing	Local thru RDP & ICA, LPD
Mgt. Software	VNC
