

Speed, Security, Features, And Easy Upgrades -

Eliminate all these problems with the new Thin Client NT-5000V, a high-performing, power-conserving, money-saving alternative to your costly network.

The Most Optimized Windows XPe Thin Client Has Arrived

Your business demands a lot from your PC and network. You're sick and tired of under-performing systems that drain your IT budget—workstations that crash and lose precious data, applications that don't operate the same from one terminal to the next, and few connectivity options.

HAD ENOUGH?

Eliminate all these problems with the new Thin Client NT-5000V, a high-performing, power-conserving, money-saving alternative to your costly network.

But can it do everything your PC's do? You bet! Thin Client now offers the same features you expect from high-end PC's—wireless, smart cards, 1 serial port, and 6 USB connections.

- **Life is easier with everybody on the same page.** All workstations use the same operating system and the same versions of each application. Each user sees exactly what everybody else sees. No more confusion.
- **Dazzle your clients.** Rich multimedia experiences bring life to your presentations. You'll be remembered.
- **Go faster with more features.** Speed is key in today's fast-paced world. With 1.0-GHz processing power, the NT-5000V executes your local applications and multimedia decoders with lightning-quick reflexes. Zing.
- **Run your favorite software and access other systems.** Pre-installed software takes care of whatever you need to get your work done. From the latest RDP and ICA to the most updated versions of Internet Explorer, Windows Media Player, and Office—the NT-5000V arms you with productivity tools that make your daily tasks a breeze.
- **What if you need to access IBM mainframe and other legacy systems?** No problem with an available full terminal evaluation suite. As if that weren't enough, you can also install limited local applications and custom drivers using EWF file system protection utility. Your tasks are handled.
- **Expand as you need to.** The NT-5000V supports Smart Card authentication. Add one any time you want.
- **Rest assured your confidential business information is secure.** It's all on the centralized server with one single point of management, meaning nobody can access it (nor copy it to a hard drive) without your permission. Breathe easier. You're safe.
- **De-clutter your desk.** Lean and sleek, the NT-5000V takes up so little space you'll hardly even know it's there. Say goodbye to big bulky boxes that get in your way.
- **Expand when you need to—seamlessly and without effort.** Want to update remotely? The NT-5000V makes it easy for your administrator to configure and duplicate local terminal settings—through standard VNC, AT Labs' NetAdmin™ tools, or extended feature Net-Viewer management software. As the future arrives, the NT-5000V is prepared to expand with it.
- **Cut costly maintenance from your budget.** Advanced design with low power consumption + Solid-state storage for longer life = Your money saved.
- **Manage remotely with no headaches.** Using a VNC, or NetAdmin™ software, remote management is a breeze. Click. Click. Done.
- **Say goodbye to local application updates.** All applications are centralized, meaning your network updates all workstations from one main location. Simple and easy.

For a free 15-point evaluation of your current network, call 866-792-2647 or visit www.atlabs.com. An expert technician will ask you a few questions and quickly determine if ThinClient is a viable option for you. It takes only 15 minutes and you don't have to give us your contact information if you don't want to. No unwanted mailings or phone calls. We respect your privacy.

The Most Optimized Windows XPe Thin Client Has Arrived

Hardware Specifications

Processor	1.0Ghz
Memory	64MB expandable to 512MB
Flash Memory	512MB expandable to 1.0GB
VGA Port	1280 x 1024 at 32-bit. 1600x1200 at 16 bit
LAN	One 10/100 Base-T
Keyboard/Mouse Port	PS2 mini-DIN
Serial Port	One RS232C/ DB9
Parallel Port	One DB25
Smart Card	Yes
USB	Six
Sound	16-bit stereo, mini-mic
Power Supply	External, auto sensing
Dimensions	8.4in H x 1.8in W x 8.0in D
Protocol	Microsoft RDP & Citrix ICA

Software

Operating System	Windows, XP embedded SP-2
Server Support	Windows 2000 advanced server, Windows 2003 w/term services, Citrix Metaframe
Web access	Full featured, Internet Explorer
Sessions	Multiple, in Windows
Terminal Emulations Suite	Optional
Network Protocols	TCP/IP with DNS, DHCP and PPP, load balancing supported by Citrix ICA, remote host connect via VPN
Printing	Local thru RDP & ICA, LPD
Mgt. Software	AT Labs NetAdmin™ remote management software
