

# Go Faster While Doing More With ThinClient X5250 for Enterprise Applications

With the NetTerminal™ X5250, you move up to light-speed. Your tasks run smoothly and quickly—and you save valuable time you can use elsewhere.

Your time is critical to your success. You can't afford to waste a second of it. Don't you wish you had a solution that delivers not only high-performance Windows productivity but also fast mainframe access? And wouldn't it be great if it gave you easy and secure access to Web and Java based applications simultaneously?

## YOUR SOLUTION HAS ARRIVED.

With the NetTerminal™ X5250, you move up to light-speed. Your tasks run smoothly and quickly—and you save valuable time you can use elsewhere. Easy to install, easy to use, and easy to manage—the X5250 is the fastest ThinClient solution for Enterprise network infrastructure.

What else can the X5250 help you do?

- **Be in two (or more) places at once.** Separate windows access Unix, and web servers simultaneously. The NetTerminal's local windows access applications from server. Each local window corresponds to application running on a server. Get more done in less time.
- **Say goodbye to local application updates.** All applications are centralized, meaning your network updates all workstations from one main location. Simple and easy.
- **Share your work without leaving your desk.** Move teamwork to a new level with all peripherals stored together on the TCP/IP network.
- **Connect to all the resources you need.** Built-in support for all industry standard protocols fits seamlessly into your IT infrastructure—including TCP/IP, Microsoft RDP, Citrix ICA, and XDMCP. Relax. You're connected.
- **Manage remotely with no headaches.** Using a Web browser, VNC, or NetAdmin™ software, remote management is a breeze. Click. Click. Done.
- **Upgrade painlessly.** No more complex boot server software installations. Just upgrade over the network using the latest Flash storage technology. (And get multiple feature sets to address specific requirements...anytime you need them.)
- **Enjoy peace and quiet.** No more annoying hums and clacking noises. The X5250 makes so little sound that you may even forget it's on.

For a free 15-point evaluation of your current network, call 866-792-2647 or visit [www.atlabsinc.com](http://www.atlabsinc.com). An expert technician will ask you a few questions and quickly determine if ThinClient is a viable option for you. It takes only 15 minutes and you don't have to give us your contact information if you don't want to. No unwanted mailings or phone calls. We respect your privacy.

# Thin Client X5250 for Enterprise Applications

## Hardware Specifications

<b>Processor</b>	1.0 Ghz
<b>Memory</b>	256 MB expandable to 512 MB
<b>Flash Memory</b>	128 MB expandable to 2.0 GB
<b>VGA Port</b>	1280 x 1024 at 32-bit.
<b>LAN</b>	One 10/100 Base-T
<b>Keyboard/Mouse Port</b>	PS2 mini-DIN
<b>Serial Port</b>	One RS232C/ DB9
<b>Parallel Port</b>	One DB25
<b>Smart Card</b>	Optional
<b>USB</b>	Six
<b>Sound</b>	16-bit stereo, mini-mic
<b>Power Supply</b>	External, auto sensing
<b>Dimensions</b>	8.4in H x 1.8in W x 8.0in D
<b>Protocol</b>	Microsoft RDP, Citrix ICA, Telnet, Secure Shell

## Software

<b>Operating System</b>	Embedded Linux 2.4.26
<b>Server Support</b>	Windows 2000 advanced server, Windows 2003 w/term services, Citrix Metaframe Linux and Unix
<b>Web access</b>	Full featured, Mozilla/Firefox
<b>Sessions</b>	Multiple, in Windows
<b>Terminal Emulations Suite</b>	Complete. Includes: IBM, DEC, HP,SCO Tandem, Data general, and Wyse
<b>Network Protocols</b>	TCP/IP, PPPoE, Dial-up, DNS Client, WINS Client, DHCP Client
<b>Printing</b>	Local thru RDP & ICA, LPD
<b>Mgt. Software</b>	AT Labs NetAdmin™ remote management software
